

# Survey Project Rubric

Project Component	Possible Points	Earned Points	Point % Earned
Survey question—statistical question	10		
Prediction—quality of description, possible data discussion, rationale explained	5		
Data collection process—explanation of process	5		
Frequency table—includes all participants in survey, displayed in organized manner, easy to follow	5		
Data display #1	10		
Data display #2	10		
Data display #3	10		
Central tendency calculation: mean	5		
Central tendency calculation: median	5		
Central tendency calculation: mode	5		
Central tendency calculation: range	5		
Central tendency calculation: maximum and minimum	5		
Conclusion—based on data collected, reasonable, detailed description is accurate as based on data collected	15		
Variables—variables impacting the survey were presented with explanations of how the student considered these variables in the survey project	5
